FEATURES

- One-shot treatment
- Safe on stainless steel
- Concentrated
- Easy to use

AREAS OF USE

- Dairy processing plants
- Food & Beverage manufacturers
- Abattoirs
- Small goods manufacturers
- Engineering workshops
- Poultry & egg processors

DESCRIPTION

ALKALI is an alkaline powder blended with surfactants and sequestering agents, specifically designed for alkaline cleaning and de-rusting of metal parts. It provides an efficient way of removing superficial rust and cleaning away of fats, blood and grease in a one-shot process.

ALKALI can be used to clean and de-rust hooks and gambrels in the food processing industry as well as cleaning engines and parts used in other industrial areas.

DIRECTIONS FOR USE

Hooks and Gambrels: Use 100-200g/L depending on soiling at a temperature of 80-95°C. Immerse for 10-15 minutes. Agitating the solution will aid in the cleaning action. Rinse off all product contacting surfaces with potable water after use. To protect the hooks and gambrels from rusting, immerse in a bath of PROGUARD.

Engines: Use at 200-300g/L in hot water (80-95°C).

SAFETY INFORMATION

ALKALI is classified as Hazardous according to the GHS.

ALKALI is classified as Dangerous Goods according to the ADG Code (7th Ed).

ALKALI is a Scheduled Poison according to the SUSMP.

Avoid contact with eyes and skin. Refer to SDS for further information.

FIRST AID INFORMATION

For advice in an emergency, contact a **Poisons Information Centre (Phone Australia 13 11 26 or New Zealand 0800 764 766) of a doctor at once.** If swallowed do NOT induce vomiting. Wash out mouth thoroughly with water and seek immediate medical attention. If in eyes, hold eyelids apart and flood with water for at least 15 minutes. If on skin, remove contaminated clothing and wash affected area with running water. Seek immediate medical attention.
