FRUIT WASH

Fruit & Vegetable Wash

FEATURES

- Sanitising properties
- Concentrated
- No rinse application

AREAS OF USE

- Fruit growing & processing industry
- Vegetable growing & processing industry
- Food handling areas
- Caterers

DESCRIPTION

FRUIT WASH is a chlorine based solution designed to be applied on fruit and vegetables in order to reduce the number of malicious microorganisms on the surface.

DIRECTIONS FOR USE

The following dilution rates will give the listed concentration of available chlorine, measured in ppm:

1:200 - 50ppm available chlorine; **1:100** - 100ppm available chlorine

It is widely accepted to use a solution of 100ppm of available chlorine for washing salads, fruit and vegetables. Soak for 1-5 minutes and drain well.

To prevent microbial contamination, close containers immediately after use and do not mix with detergents or other chemicals. Product strength should be periodically checked and adjusted.

SAFETY INFORMATION

FRUIT WASH is classified as Hazardous according to the GHS.

FRUIT WASH is NOT classified as Dangerous Goods according to the ADG Code (7th Ed).

FRUIT WASH is NOT a Scheduled Poison according to the SUSMP.

Avoid contact with eyes and skin. Refer to SDS for further information.

FIRST AID INFORMATION

For advice in an emergency, contact **Poisons Information Centre (Phone Australia 13 11 26)** or a **doctor at once**. If swallowed do NOT induce vomiting. Wash mouth thoroughly with water and seek medical attention. If in eyes, hold eyelids apart and flood with water for at least 15 minutes. If on skin, remove contaminated clothing and wash affected area with running water. Seek medical attention if irritation persists.
