HI FLUX PRV-G

Sanitiser/Preservative

FEATURES

- Medium foam profile
- Easy in-line sanitation
- Improved soil removal
- Environmentally friendly
- HALAL and KOSHER approved

DESCRIPTION

HI FLUX PRV-G is a formulated organic acid based sanitiser especially designed for sanitising and preserving membranes at dairy and food processing facilities.

DIRECTIONS FOR USE

Plant Sanitation: Dose the system with 0.2-0.5% v/v solution of HI FLUX PRV-G and recirculate for 5-10 minutes at ambient temperature.

Membrane Preservation: Ensure the plant has had a full CIP and has been flushed to neutral pH. Dose HI FLUX PRV-G at a concentration of 1.0% v/v at ambient temperature, set the pH range to 3.5 - 5.0. Recirculate and make sure the concentration is above 0.5% v/v. Isolate valves, close lids and outlets in order to keep the plant fully flooded. Measure the strength of HI FLUX PRV-G every 5 days for short term preservation and every 15 day for long term preservation. Replace with a fresh solution if needed.

Please note that all membrane cleaning must be carried out in accordance with the membrane manufacturer's guidelines, recommended limits of pH, temperature and exposure time should be followed.

Consult your Jasol representative for further information.

AREAS OF USE

- Dairy processing plants
- Food processing plants

SAFETY INFORMATION

HI FLUX PRV-G is classified as Hazardous according to the GHS.

HI FLUX PRV-G is classified as Dangerous Goods according to the ADG Code (7th Ed).
