

HOOK & ROLLER ACID

Acid Cleaner

FEATURES

- Highly concentrated
- Robust rust-removing action
- Free rinsing properties
- Mild sanitising action
- Complete cleaning & corrosion protection system when used with

DESCRIPTION

HOOK & ROLLER ACID is an inhibited liquid acid formulation designed for descaling stainless steel, removing mineral deposits and removing rust and scale from meat hooks, rollers and gambrels in abattoirs and meat processing works. It is designed for use on conjunction with Jasol HOOK & ROLLER ALKALI and PROGUARD for complete maintenance of steel components.

DIRECTIONS FOR USE

Clean hook & roller tank. Add 7-10L of the product per every 100L of water in the tank. Immerse cage with hooks and rollers into the acid bath. Soaking time varies from 2-5mins depending on the mineral soiling level. Lift the cage out of the bath and let it drain for one minute. Immerse the cage in a hot water bath for 5 minutes to rinse the equipment. Continue process with PROGUARD to complete the cleaning process.

Consult your Jasol representative for further technical information.

AREAS OF USE

- Meat hooks & gambrels
- Rollers & rails
- Slides & chains
