FOOD RETAIL

FEATURES

- Economical
- Free rinsing properties
- Wash neutraliser
- Water conditioning
- Phosphate free
- HALAL approved
- KOSHER approved

AREAS OF USE

- Restaurants
- Cafeterias
- Hospitals
- Nursing homes
- Hotels & motels
- Schools
- Other public facilities

DESCRIPTION

SPOT AID is a rinse additive for use in automatic dishwashers. It promotes free rinsing and prevents water spotting and streaking leaving crockery and cutlery sparkling. Coupled with the use of hot water, SPOT AID ensures fast drying times, and tableware is swiftly returned for re-use. Manual drying is eliminated thus reducing labour costs and also preventing cross-infection from the use of towels.

DIRECTIONS FOR USE

SPOT AID is introduced during the rinse cycle at a very low concentration of 7-10 mL/45L of water via automatic dosing equipment. This equipment is provided and serviced by Jasol Australia. For best results flash drying at 80-90°C is recommended. In domestic dishwashers the rinse additive is dispensed from a small reservoir unit which must be kept full.

SPOT AID may also be used manually. A few mL of SPOT AID should be added to a sink of almost boiling water. Immerse the articles to be rinsed in this solution using a basket or a tray, remove and allow to drain.

SAFETY INFORMATION

SPOT AID is classified as Hazardous according to the GHS.
SPOT AID is NOT classified as Dangerous Goods according to ADG Code (7th Ed).
SPOT AID is NOT classified as a Scheduled Poison according to the SUSMP.
Avoid eye contact. Refer to SDS for further information.

FIRST AID INFORMATION

For advice in an emergency, contact **Poisons Information Centre (Phone Australia 13 11 26)** or a **doctor at once**. If swallowed do NOT induce vomiting. Wash mouth thoroughly with water and seek medical attention. If in eyes, hold eyelids apart and flood with water for at least 15 minutes. If on skin, remove contaminated clothing and wash affected area with running water. Seek medical attention if irritation persists.
